

FERMAX

SIP AUDIO & VIDEO INTERCOM

Overview

FERMAX's SIP audio and video intercom allows you to answer your intercom and unlock the door from anywhere using a smartphone, VOIP phone or tablet device. Having recently gone through a software update our iPhone and Android applications uses the latest H264 video and G722 audio codecs to provide you with the highest quality video image and audio clarity similar to Facetime or a Skype call. The app works best with an onsite Wifi connection, however can also be used via 3G/4G mobile data connection if configured correctly.

Features

- VOIP / SIP communication
- Built-in colour camera (audio only optional)
- POE or power supply
- 2 No. relays outputs for opening 2 electric locks
- Intercommunication between SIP devices
- FERMAX front door station aesthetics
- Compatible with most SIP based VOIP servers (i.e. CISCO, etc...)
- Works with iPhone/iPad and Android devices
- Bespoke door stations are also available using material such as 316 stainless steel, copper, brass, matt black

Integration

We have tested compatibility of our SIP video intercom door station with the following smart home integration systems;

If you would like to verify compatibility of our FERMAX SIP video/audio door station with another smart home integration system please contact us.
